

# HINO

## DAB+ Digital Radio Multimedia System

Class Leading Multimedia System

# Features

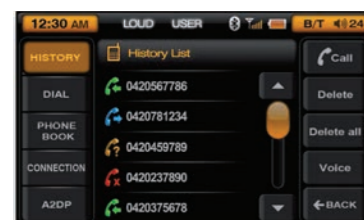

Hino Motor Sales Australia has become the first vehicle manufacturer in Australia to include DAB+ digital radio as standard equipment across its range of vehicles. All Hino 300, 500 and 700 Series trucks manufactured from September 2011 onwards feature the new Australian-designed multimedia unit which includes DAB+ as factory-fitted standard equipment.

## DAB+ : It's radio as you know it, plus...

Australia's first double din unit to feature a DAB+ Receiver in-built. Near CD quality radio transmission is now at your fingertips (eastern seaboard cities only at this stage), with the added bonuses of digital only stations and track only radio show information displayed on your screen.

## Bluetooth Connectivity

No more missed calls while you're driving, the Hino Multimedia Unit features both Bluetooth Handsfree and Music Streaming. Download your phonebook and access all your contacts directly from the unit. Change music tracks directly from the touchscreen while streaming music from your phone.

## Music

Find your favourite album, artist or song title through a number of options – iPod, USB, SD, CD and MP3/WMA/AAC portable devices. All this is accessible via the super responsive 6.1" Touch Screen.

# Features

## Movie

View your favourite movies or video clips via the front loaded DVD player/USB/SD or iPod/iPhone. All popular formats are supported, which include DVD video\*/+R/-R/RW/CD-DA/RW/VCD MPEG4\*/DivX\*/xVid\*/WMV\* playback.

## Photo

View your photos directly from DVD/CD/USB/iPod/iPhone or any other portable storage device through the High-Resolution Digital 6.1" WideScreen. All Popular formats are supported, which include MPEG1/MPEG2/MPEG4/JPEG.

## AUX

Connect your portable MP3/WMA Media Player through the stereo auxiliary front input to listen to your favourite tunes through your speakers.

## Radio

As the DAB+ rollout currently does not cover country areas and other places such as tunnels, the Hino Multimedia Unit includes a traditional AM/FM tuner with 48 presets for hassle-free driving.

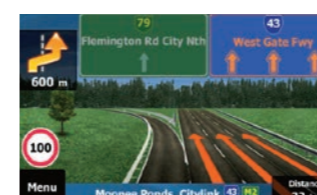

## SD/USB

For all your portable media needs. Capable of supporting USB devices of up to 1Amp current draw (including some portable hard drives). Front SD (doubles as the optional navigation receptacle), front USB/iPod (optional cable) and rear USB/iPod (optional cable).

## iPod

Plug in your iPod via the optional dedicated lead and Browse and Select all of your folders, including Album, Artist & Song Titles through the 6.1" Touch screen. Music and video all at your fingertips.

## Optional Navigation

Never get lost again with iGo Primo Navigation paired with the latest NAVTEQ maps. Easy to use, feature-packed menu offering you over 600,000 Points of Interest, overhead lane guidance and truck specific routing to name a few. It's in-truck Navigation the way it should be!

## Optional Rear View Cameras

Protect your vehicle and loved ones as well as your valuable property. When fitted, view the rear, front or side of your vehicle through the 6.1" Digital Widescreen. An optional reverse trigger system can also be fitted.

# Specifications

Hino's multimedia unit is standard equipment on all new 300 Series, 500 Series and 700 Series models. It can also be fitted as an aftermarket accessory to any Hino model equipped with a 2-DIN radio mount provision.
